Wycliff Njenga

iOS Engineer (Swift, SwiftUI, UIKit, Objective-C, RxSwift) with 7+ years of experience building high-quality mobile applications in travel, e-commerce, social media, health, and SaaS industries. Skilled in crafting scalable, user-centric solutions using MVVM, Clean Architecture, and cloud technologies. Proficient in integrating advanced features such as real-time data sync, push notifications, and secure authentication. Experienced in the full app lifecycle, from ideation to deployment on the App Store. Senior AI trainer and reviewer for LLM coding models since 2024. Blue Card eligible.

LinkedIn: https://bit.ly/4ltuMOB

GitHub: https://bit.ly/41BBMBL

Location: Nairobi, Kenya (open to relocation)

TECHNOLOGIES

Languages: Swift (7+ yrs), Objective-C (2 yrs), TypeScript, HTML/CSS (2 yrs)

UI Frameworks: SwiftUI (4 yrs), UIKit (7 yrs), AppKit (macOS), WidgetKit, React Native (Expo)

Reactive & Concurrency: Combine (3 yrs), RxSwift (3 yrs), async/await, GCD

Architecture: MVVM, MVVM-C, Clean Architecture, MVC, modular Swift Packages

Networking & Data: REST APIs, GraphQL, URLSession, Alamofire, Core Data (5 yrs), Realm (2 yrs), SQLite (2 yrs)

Backend & Cloud: Supabase (Postgres, Auth, Edge Functions), Firebase, GCP (5 yrs), AWS S3 (2 yrs), Vapor (1 yr)

Apple Frameworks: StoreKit 2, Core Bluetooth/BLE, AVFoundation, MapKit, Core Location, CryptoKit, Photos/PhotosUI, UserNotifications/APNs, WebKit, Core Graphics

Payments & Security: card payment flows, tokenisation, token-

WORK EXPERIENCE

Triply.co (TravelTech) ***iOS Engineer*** *Nairobi, Kenya (onsite) 02/2024 – Present*

- Developed both B2C and B2B iOS applications, covering the full product lifecycle from requirements gathering, development, testing, and deployment to monitoring in production. The B2C app enables customers to book events, packages, and listings; the B2B app provides hosts and tour operators with CRMs, event creation tools, and operational dashboards.
- Contributed to code reviews, debugging, and performance optimisation, ensuring adherence to MVVM and Clean Architecture principles for maintainable, scalable codebases.
- Collaborated with product managers, designers, and backend teams to deliver unified booking and management experiences, improving usability and aligning features with business objectives across African travel markets.
- Improved app load times by 15% and reduced crash rates by 20% through targeted memory management and efficient API handling, directly increasing customer retention and satisfaction.

Tech Skills: Swift, SwiftUI, UIKit, Combine, RxSwift, REST APIs, GraphQL, Core Data, MVVM, Clean Architecture, GCD, URLSession, Alamofire, Firebase, Xcode, TestFlight, GCP.

micro1 · Outlier (Scale AI) · Mercor · DataAnnotation ***Senior AI Trainer & Reviewer (Contract)*** *Remote 2024 – Present*

- Write Swift and iOS coding prompts with reference solutions and tests, used to train and evaluate large language models on real-world mobile engineering tasks.
- Review, rate and correct AI-generated code for correctness, edge cases, security, performance and

based auth, Keychain, M-Pesa and Apple Pay style checkout

Analytics & Engagement: Firebase Analytics/Crashlytics, Amplitude, Braze

DevOps & Tooling: Git/GitHub/GitLab (8 yrs), Fastlane (3 yrs), Jenkins (1 yr), CocoaPods, Swift Package Manager, XcodeGen, Sparkle, Xcode, Instruments, TestFlight, App Store Connect

Testing: XCTest, XCUITest, unit and UI testing

AI & LLMs: LLM code evaluation, RLHF response ranking, prompt and rubric writing, data annotation, Anthropic Claude API

Soft Skills: remote collaboration, code review leadership, stakeholder communication, Agile/Scrum

AWARDS & CERTIFICATIONS

Top 10 Finalist – Google Developer Student Clubs Campus Challenge (2021)

Led a team of 5 delivering mobile and web tech workshops, ranking top 10 out of 1,000+ campus tech initiatives worldwide.

Certified Google UX Designer (2022)

Credential ID: BKEJ7WMDLHVT — UX design specialisation covering user research, prototyping, and usability testing.

LANGUAGES

English (Fluent)

Swahili (Native)

German (Beginner)

EDUCATION

Taita Taveta University

B.Sc. Applied Mathematics & Computer Science
Nairobi, Kenya

Swift/iOS best practices, documenting each issue clearly.

- Compare and rank model responses side by side (RLHF) against detailed rubrics, writing concise rationales that explain which answer is better and why.
- Act as senior reviewer: audit other trainers' submissions for accuracy and guideline compliance, and give written feedback that raises team quality.
- Annotate images and objects for computer-vision datasets, following labelling guidelines precisely.

Tech Skills: LLM Evaluation, RLHF, Prompt & Rubric Writing, AI Code Review, Swift, SwiftUI, UIKit, Unit Tests, Data Annotation, Quality Assurance.

Decise LLC (SoftTechnology) ***Lead iOS Engineer***
Chicago, Illinois, USA (remote) 03/2023 – 02/2024

- Implemented enhancements to iOS clients' payment workflows — rebuilding the card payment flow, introducing a FlyBuy feature using BLE, integrating gamification mechanics, and reinforcing security by implementing token-based authentication across full cycles from requirements gathering to deployment and monitoring.
- Streamlined bug triage and fixes, improving overall app stability and ensuring maintainable, production-grade releases.
- Collaborated closely with stakeholders, especially City BBQ's UX/design team and backend engineers, to align FlyBuy and gamified features with business goals, resulting in smoother in-restaurant operations and user experience for both diners and staff.
- Boosted security and performance by introducing tokens and BLE flows that reduced payment-related errors by 30% and accelerated payment processing by 20%, improving throughput and customer satisfaction.

Tech Skills: Swift, BLE, Core Bluetooth, UIKit/SwiftUI, Security (tokenisation), Payment SDKs, Bug Fixing & Debugging, MVVM-C, Xcode, APIs, Gamification Integration, XCTest.

Music of Wisdom (Meditation/Wellness) ***iOS Engineer*** *United States (remote) 01/2022 – 04/2023*

- Developed a meditation and mindfulness iOS app from scratch, designing and coding the full product lifecycle from requirements gathering to building, testing, deploying, and maintaining production-ready builds. Integrated voiceovers, background music, and editing tools for a seamless audio experience.
- Led audio editing workflows by cutting and blending voice tracks, layering background music, and ensuring

high-quality, calming soundscapes through precise engineering and creative oversight.

- Collaborated with meditation creators, music producers, and UX designers to produce immersive, royalty-free content including guided tracks, ambient tones, and brainwave frequency players.
- Enhanced user engagement by delivering 3 hours of curated royalty-free meditation tracks via in-app downloads and integrating customisable background audio features, boosting download uptake and session replays by 20%.

Tech Skills: Swift, AVFoundation, UIKit, Audio Editing (voiceover mixing, track layering), REST APIs, iOS Audio Frameworks, UX Implementation, Testing & Debugging.

OTHER WORK EXPERIENCE

Vint (E-commerce & Mobile Applications) ***iOS & Android App Developer*** *United States (remote) Jun 2019 – Feb 2022*

Developed, maintained, and tested Android and iOS e-commerce apps from initial concept to deployment. Worked on UI design, backend integration, and performance optimisation for smoother user experiences.

Postagic (Social Networking) ***iOS Developer***
Maharashtra, India (remote) Feb 2022 – Sep 2022

Built and enhanced features for a social connection app available on the App Store, improving messaging reliability and optimising photo sharing functionality.

VOLUNTEERING & LEADERSHIP

Google Developer Student Clubs – Lead · Taita Taveta University, Kenya

Led a team of 5 to teach fellow students diverse technology stacks, from mobile app development to website creation. Organised workshops, hackathons, and coding sessions, resulting in the club ranking in the top 10 in the campus tech competition worldwide.

PROJECTS

- Kito UI Libraries (KitoButtons, KitoFields, KitoScreens) – Creator: Open-source SwiftUI component libraries shipped as Swift Packages: themeable buttons with variants, loading and async actions; form inputs for text, email, password, phone with country picker and OTP; and prebuilt sign-in, sign-up, profile, M-Pesa and card checkout screens. github.com/wykeenjenga

- KittoCleaner – Creator: Storage cleaner for Mac and iPhone from one SwiftUI codebase (MVVM): Smart Clean, duplicate finder, disk space analyser, Photos cleanup and an AI assistant, with machine-bound licensing, StoreKit, Sparkle updates and a Supabase backend. kittocleaner.com
- Useless – Creator: SwiftUI social app (iOS 17+) with friends, moderated chats, group games and per-category privacy, built on Supabase Auth, Postgres with Row Level Security and Edge Functions, plus StoreKit 2, APNs and Firebase Crashlytics. useusless.com
- mynomp – iOS Engineer: iPhone accountability app that pairs users with a buddy for live focus sessions, friendly promises and streaks. mynomp.com
- Slim Chickens – iOS Engineer (2025 – 2026): Top contributor to the restaurant chain's native SwiftUI ordering app: menu, cart, promo codes, upsells, favourites, rewards and a home-screen widget, with Braze messaging, Amplitude analytics and MapKit.
- City BBQ – Lead iOS Engineer (Decise LLC): Rebuilt the card payment flow and added BLE FlyBuy pickup, gamification and token-based authentication, cutting payment-related errors by 30%.
- Triply.co – iOS Engineer: B2C booking app and B2B operator app with CRMs and dashboards for African travel markets; 15% faster load times and 20% fewer crashes.
- Music of Wisdom – iOS Engineer: Meditation app built from scratch with AVFoundation voiceovers, background music and brainwave players; 20% more downloads and session replays.
- Postagic – iOS Developer: Social connection app on the App Store; improved messaging reliability and photo sharing.
- SaveONE-life – Lead iOS Developer: Built a mobile app designed to connect blood donors with recipients in emergencies. Led development and deployment using Swift, SwiftUI, Firebase, and REST APIs.
